Empathize & Discover

Date	29 September 2026
Team ID	SWTID-2026-4940
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes. It helps the team understand the users involved in standard laptop procurement and identify their goals, concerns, frustrations, and expectations.

For this project, the empathy map focuses on employees and IT procurement/support team members who request, approve, process, and track standard laptop orders. The map is used to understand the current manual process and the user needs that can be addressed through Flow Designer automation.

Project-focused user: Employee / IT Procurement or Support Team Member

Empathy Map

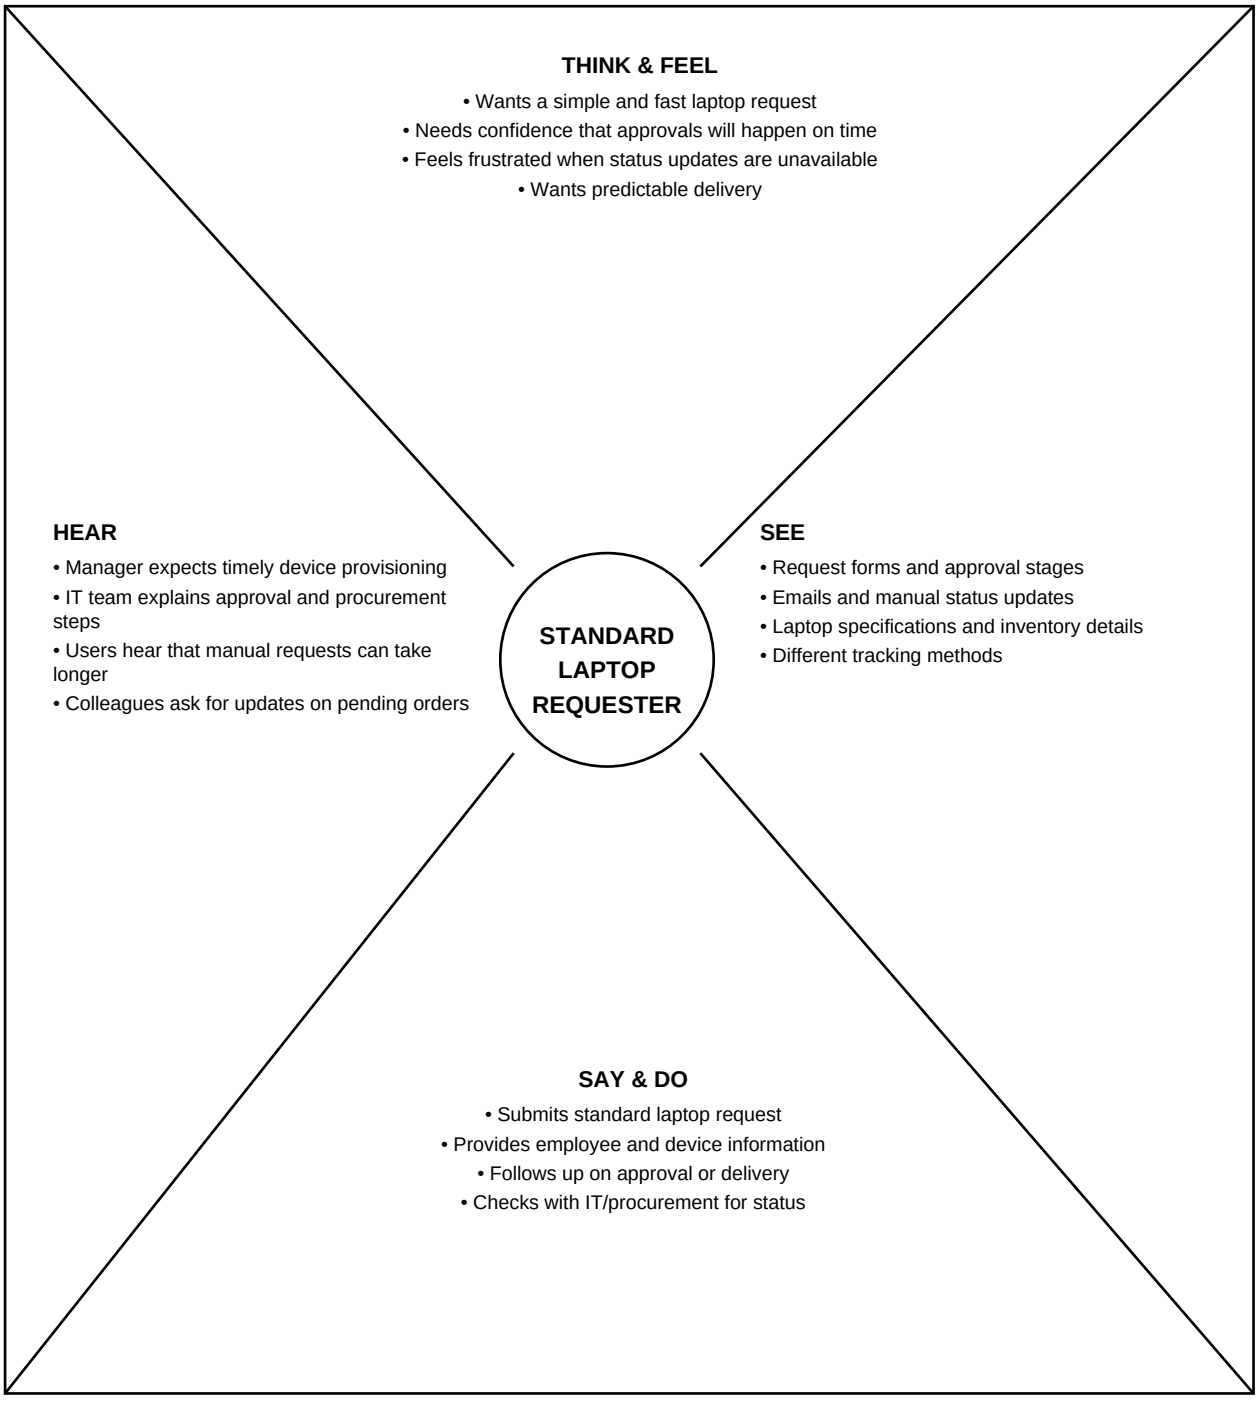
Empathy Map – Standard Laptop Procurement



Pain

- Manual data entry and repeated follow-ups
- Approval and procurement delays
- Limited visibility of request status
- Risk of missed information or errors

Gain

- Automated request and approval routing
- Faster and consistent laptop ordering
- Clear status tracking and notifications
- Reduced IT procurement/support workload
