Ideation Phase

Define the Problem Statements

Date	29 September 2026
Team ID	SWTID-2026-4940
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create problem statements from the customer's point of view. The statements below focus on the difficulties experienced during standard laptop procurement and identify the impact of manual ordering, approvals, and fulfillment activities. This helps the team design an automated Flow Designer solution that makes standard laptop requests faster, more consistent, and easier to track.

Problem Statement (PS)

PS	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	an employee or manager requesting a standard laptop	submit and receive a standard laptop order quickly through a simple process	the request requires manual coordination, approvals, and repeated follow-ups	there is no streamlined automated workflow for standard laptop requests	frustrated and uncertain about when the laptop will be delivered
PS-2	an IT procurement or support team member	process standard laptop requests consistently and track their status	manual data entry, approval follow-ups, and order tracking take time and can cause delays	standard requests are not automatically routed through a defined workflow	overloaded and concerned about processing errors and delayed fulfillment
